

About AI

- 1) An American computer scientist John McCarthy first used the word Artificial Intelligence.**
- 2) In short, Artificial Intelligence is demonstrated as 'AI'.**
- 3) Of the two types of AI, strong AI is also known as Artificial General Intelligence.**
- 4) Machine Learning and Deep Learning the base of weak or narrow AI.**
- 5) Machine with Artificial General Intelligence can perform most of the tasks like a human.**
- 6) Artificial Intelligence is faster and smarter than humans in many cases.**
- 7) AI developed for some destructive purpose can bring major harm to the human being.**
- 8) Artificial Intelligence provides the result with incredible accuracy.**
- 9) Modern Robots are the best example of the power of AI.**
- 10) AI has taken over in most of the devices of the present time.**
