

About Hate

Offensive and Criticizing anyone is a really bad way of doing things. Because Offensive things are easier to say and forget than to receive and move on. I have been noticing the recent rise of Offensive Tones to Criticize some of the content creators of the world. Which has made them upset and made them react in bad way or lash out at people. Although their lash out itself can be seen as signs of retaliation, we should understand that it is us that is creating such chaos and Catastrophe. This Chaos or Catastrophe is best reflected on people's lazy attempt at showing their lazy and ill behavior towards others.
