

About WEB

What about Full-Stack Development?

If both Frontend and Backend development appeal to you, you could consider becoming a [Full-Stack Developer](#).

Full-stackers take care of both the front-end and the back-end, and need to know how the web works on all levels, in order to determine how the client- and server-sides will relate. Naturally working up to this level of expertise will take longer, as there is more to learn.

Getting Started in Web Development

All this may sound daunting at first, but you don't need to know everything at once. You will grow your knowledge progressively. And things will begin to click.

The great news is, learning to become a developer is easily accessible and affordable. This is especially true with OpenClassrooms. Emily Reese, Web developer and Teacher at OpenClassrooms explains,

Whatever aspect of web development attracts you, we have programs that can help you reach your goals.

No matter your background, you can learn web development. Emily told us,
